COMPUTERLAB, EXERCISE 1.1-2, SOLUTION

Abstract

Exercise 1.1-2 accelerate a proton from 20 keV to 6 MeV. Various quantities are plotted and compared with theoretical expectations.

Contents

1 1.1-2.a - Acelerate from 20 keV to 6 MeV

The input data file is given in page 3, a gnuplot script to plot the accelerated trajectory is given page 4.

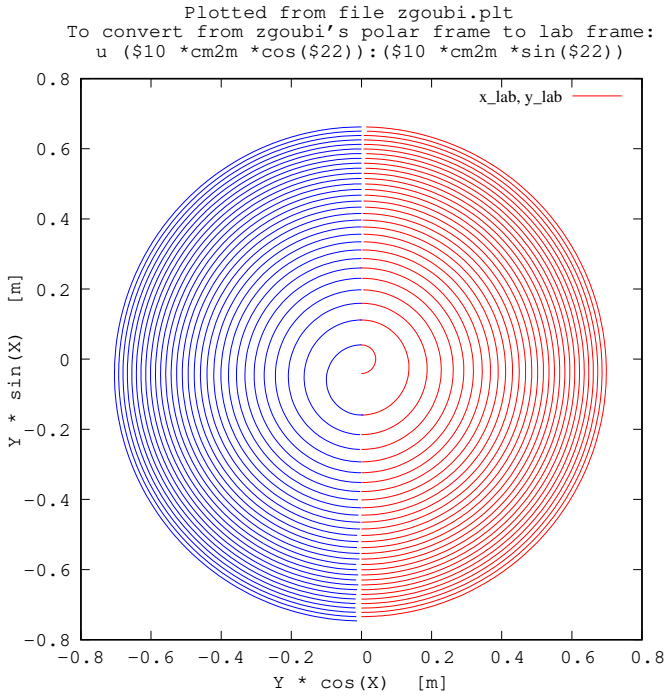

Figure 1: Accelerated trajectory. Namely, a succession of half-circles, with increasing radius.

Optical sequence in zgoubi, accelerated orbit
